DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-7 and 11-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claims 2-7, 11-19 recite the broad recitation "coating which is the aluminosilicate glass or a zirconia silicate glass". Claims 2, 5-7 and 11 also recite "coating is an aluminosilicate glass", and claims 3-4 and 12-19 also recite "coating is the zirconia silicate glass" which are the narrower statements of the range/limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-21 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 4,341,841 to Ohno et al.

Regarding claims 20-21, Ohno discloses a substrate with a first coating of an amorphous glass containing silicon and a second layer of an inorganic layer such as an aluminosilicate glass which may have opacifiers comprising Ca or Zr or Ti (column 3 lines 4-8 and 55-65 and column 4 lines 7-9). Additionally, Ohno discloses a molten state is created through the forming process, which would apply to the interlayers (column 4 lines 59-63). Claims 21 and 22 are product by process claims wherein the patentability of the product does not depend on its method of production. “If the product in the product by process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process unless it can be shown that the product produced by the process is in some manner measurably distinct from the product produced by another process.” *See MPEP 2113*. As such, the process limitations within claims 21-22 do not provide patentable distinction over the prior art.

Allowable Subject Matter

Claim 22 is allowed. Prior art of record does not disclose or make obvious a base material with an aluminosilicate glass or zirconia silicate glass containing at least one element selected from the group consisting of group 2a, or 3a or 4a of the periodic table wherein a most superficial layer of the sprayed coating forms a spherical protruded layer in which the concentration of aluminum or zirconium and elements of groups 2a, 3a, and 4a of the periodic table are lower than that of the internal coating.

Response to Arguments

Examiner acknowledges applicant's confirmation of election, cancellation of claims 8-11, amendment of claims 2-7 and 11 and addition of new claims 12-22.

Applicant's arguments with respect to claims 1-7 and 11-21 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
